Craig Gnesin,

After my recent visit to your facility in Lanseria I wanted to pass along a large thanks to you and your staff. Your Maintenance Manager Adam Moore was instrumental in making the three FS-580 NDT inspections a success. Adam was like clockwork in his actions with everything from arranging transportation for me and my test equipment to assisting me with any needs for the actual inspection. His persistence with your CAA was also outstanding in not just aligning the first two ACFT, but then obtaining a 3rd CAA approval at the last minute.

Adam has mentioned his desire to perform more of these inspections at your facility and as I understand has started a dialog with Savannah, Gulfstream to become part of our Foreign Authorities list. As the Non-Destructive Testing Group Lead for Gulfstream Aerospace, I'm excited at the prospect of helping Zenith Air become a leader in your region of the world in providing these special NDT inspections and more. If I can assist you in any way please feel free to contact me directly.

You should be very proud of your staff at Zenith Air; they exhibit a rare quality in today's world of caring about the success of your company along with having excellent communication skills. Thank you again for making my stay a very pleasant experience and we look forward to working with you again on future projects.

Best Regards,

Darryl Fuller

Non-Destructive Group Lead / RSO
